

Temporary Abutment made of PEEK

PEEK-CLASSIX polymer is a high performance, biocompatible thermoplastic designed for medical device applications. The Peek is an ideal substance for medical use in general and dental use in particular.

1. Straight abutment – P3S - Peek, H': 1-3 mm.
2. Angular abutment – P4S - Peek 15 & 25, H':1-3 mm.

Advantages:

- One of the most chemically resistant polymers available
- Exhibits a superior combination of strength, stiffness and toughness
- Bio-Compatible
- Aesthetics
- Easy to prepare at the patient's mouth
- Low electrical conductivity
