

A.B. Dental offers you a turnkey solution for the restoration of implants at extreme angles.

P12, P14 - Screw retained restoration

P14

*P14

- P14 is a restoration kit for implants with extreme angles.
- For screw retained restorations.
- Corrects the angle of the screw, enabling a better esthetic restoration.
- The adapter is available in 2 different angles 17° & 30° with two different height options 1 & 3 mm.
- Multifunctional kit with available parts for removable denture.

P12

*P12

- The P12 system provides a comprehensive solution for temporary and permanent restoration while retaining maximum precision.
- For screw retained restorations.
- Enables restoration on non-parallel implants by cancelling the hex and thereby cancelling the problem of insertion path.
- The implant double platform is a registered patent of A.B. Dental Devices.

P4-35° P4-45°

P4 – 35°, 45° – Abutment for the use of cemented restoration

P4 – 35°

P4 – 45°

- Angular abutments for cemented restoration implants at extreme angles.
- Available in extreme angles (35° and 45°).

P5-20 – Restoration for removable dentures

P5-20

*P5-20

- An abutment for attaching to an angled implant, correcting the angle of that implant (20 degree angle).
- The ball is built at an angle that distances it from the basis.
- Available in different heights (1, 2, 3, 5mm).
