## ONE PIECE ANGULAR ADAPTOR

---

NEW AND UNIQUE INNOVATIVE SOLUTION FOR SCREW  
RETAINED RESTORATIONS ON TILTED IMPLANTS

---

The adaptor consists of a base & a metal sleeve, and used for screw retained rehabilitation on non-parallel implants by correcting extreme angles of the implant. Available in angles of 17°, 30°, 42° and at heights of 1 mm and 3 mm. This adaptor can be used for switch platform.

**Main advantages:**

- ✦ One unit with a complete standard screw (1.72mm)
- ✦ Narrow and low - Appropriate solution to the aesthetic areas
- ✦ Elliptic design provides high stability
- ✦ Exceptionally strong adaptor
- ✦ Simple and user friendly solution

**Complementary accessories:**

Impression transfer, analog, titanium sleeve, Plastic sleeve and healing cap.
