# DOUBLE PLATFORM IMPLANTS THE COMPLETE FIT

---

AB DENTAL HAS AN EXCLUSIVE PATENTED SOLUTION WHICH IS INTEGRATED IN ALL OF THE COMPANY'S TWO-PIECES IMPLANTS

---

The implants are designed to accommodate two restorative platforms:

- + Deep connection (Internal Hexagon 1.8 mm), suitable for all abutments with antirotational hexagon.
- + Flat connection (0.2 mm), designed for non-engaging abutments (No hexagon).

This patent provides a simple and user-friendly rehabilitation solution, by facilitating the path of insertion for screw retained restoration onto non-parallel implants.

Both platforms are integrated in all AB Dental 3.75mm diameter implants, enabling the dentist to choose the treatment method according to his preference and the adjustment to the patient.
