PROSTHETIC KIT

THE COMPREHENSIVE SOLUTION FOR IMPRESSION TAKING

AB-Dental prosthetic kit offers the professional an easy solution in one small packaging.

It is the perfect solution for impression and transfer techniques, both for a single crown and bridge restoration.

This kit enables the professional to take a closed-tray impression with the benefits of open-tray.

AB-Dental Prosthetic Kit makes the restoration process as simple as possible; eliminating any necessary adjustments and giving the professional a complete set of tools with no need for additional parts.

Available in 4 different heights (1-4mm).

The kit is marketed in packaging of ten and includes analog, plastic transfer, healing cap, plastic sleeve and anatomic abutment.
